Speed - Static speed, increment when ready 33/66/88/100	Key - 5 Voices - Low/Mid/High/Falsetto/Blend
Notes at one second per note using Singing Pitch Trainer	
Notes at one second per note, manually from your mind	<i>The above methods will do the following:</i>
Listening to one note, pressing pause, transcribing in SPT	Provide a warm up, by starting low and getting higher gradually
Sing easy notes fast, and do a freeze hold on weak note	Equally train your entire range, so your whole voice sounds great
Count number of notes on fingers to help you organize	Stretch your range lower, so you can sound richer
Sing the transition between one section and another, slow	Stretch your range higher, so you can have more impact
Stop and hold any note in a phrase	<i>The tools to make these modifications are (click to get them):</i>
Learn the rhythm of a phrase with singer, adding accents	<u>Singing Pitch Trainer (web app created by Rached)</u>
Sing one line (max 5-10 notes) with singer, then alone	<u>Transpose Extension For Chrome (for use with YouTube)</u>
<i>The above methods will do the following:</i>	<u>Amazing Slow Downer (for Spotify/Mp3s on Smart Phones)</u>
Make you sound smooth instead of sloppy on note changes
